Abstract (en)

[origin: WO2009052897A1] A track building vehicle (1) has a roofed loading space (12) which rests on a machine frame (2), and a crane jib (16) which can be pivoted by means of drives. A loading wall (20), which is connected to the machine frame (2) and is provided for the intermediate storage of loaded material (19) which is located in the loading space (12) can be adjusted into a working position (22) which is horizontal with respect to the lateral direction of the vehicle and adjoins the loading space (12) horizontally.
