Abstract (en)

[origin: WO2009056262A1] The invention relates to a casing (10) for accommodating at least one disk-shaped data carrier (12), which can be produced from a blank (14, 16) by folding and connecting the same. The invention proposes that the casing (10) have a first casing part (18) and a second casing part (20) that is connected to the first casing part (18), in which the at least one data carrier (12) can be accommodated.
