Abstract (en)
[origin: WO2009053280A1] The invention relates to an operating panel (1) for an electrical appliance, comprising a receiving compartment (2) which is open on one side. An electronic plate (3, 3a, 3b) can be introduced into the receiving compartment via the open side and fixed, in a supported manner, to supporting surfaces (21) facing the open side (20). At least one lateral wall (22) of the receiving compartment (2) carries at least one spring tongue (23, 23') which intersects a mounting plane (24) for the electronic plate (3, 3a, 3b), defined by the supporting surfaces (21).
