Abstract (en)

[origin: EP2206655A2] The cover (16) has a sealing foil (26) which is sealed to an edge (14) of the container opening (12). The sealing foil is directly fixed at the cover. The fixing connection between the sealing foil and the cover is weaker than the intended sealing connection between the sealing foil and the edge of the container opening. An independent claim is also included for a method for sealing a container.
