Abstract (en)
The invention provides a detergent composition comprising a surfactant, a particulate foam control agent and a benefit agent. The particulate foam control agent contains 0.1 to 20 wt% of a branched polydimethylsiloxane based antifoam, 60 to 99.9 wt% of a zeolite as carrier, and 0 to 10 wt% of a polyvinylalcohol as binder. Said composition was found to provide for relatively lower run-off of the benefit agent during washing.
