Abstract (en)

[origin: EP2206852A2] The floor element (100) has an upper side (110) with an upper surface, a lower side (120) with a support structure, and surfaces lying between the upper side and the lower side. The support structure has cross beams. The floor element is made of molded material. The surfaces lying on the lower side between the cross beams are provided with the upper surface extending elements. The floor element is formed from wood- or plastic-containing composite material.
