Abstract (en)
[origin: EP2206854A2] The flap (1) has a frame (4) provided with corner connectors (6), where one of the corner connectors is provided as a bearing of a lock (9). The lock is floatably supported on the flap. The corner connectors comprise a retainer and/or a recess for a foot of the lock. The corner connectors comprise positive fit connection units for fixing the lock in its position. The lock works together with a counter part (10), which is arranged at well, a wall or a cover (2). A movement limiter (5) is arranged at the corner connectors.
