Abstract (en)

[origin: EP2206860A2] The fitting (10) has a face plate rail (11) comprising a passage (13) for receiving a bolting element (16) e.g. rolling pin, and a connecting rod (12) arranged in a longitudinal movable manner against the face plate rail. The bolting element is driven by the connecting rod. The connecting rod is movable between a locking position and a releasing position. The bolting element is driven via the passage of the face plate rail in the locking position. The bolting element is movable transverse to a movement direction relative to the connecting rod.
