Abstract (en)

[origin: EP2206870A2] The strip has a foam substance adhesive tape (15) comprising an adhesive layer (16), where the strip is attached to a frame or rail component by the layer. A seal section (12) made a soft material runs in a region of a side of a profile body (20) and the tape and lies at the frame or rail component in a mounting position. A stop section (13) i.e. stop bar (14), is provided at a region of another side of the body, where the latter side lies opposite to the former side. The stop section lies at the frame or rail component in the mounting position and laterally overlaps the adhesive tape.
