Abstract (en)

[origin: EP2207069A2] The support (6) has a stepped face (7) defining steps (8) on which end parts of striking gongs (3) are fixed by removable connection units such as screws (11), respectively, where the support is fixed on a fixed part (1) of a timepiece. A recess (13) defines feet (14) supported against the fixed part of the timepiece. Each screw successively comprises a threaded cylindrical part, a conical part and a polygonal sectioned head. An independent claim is also included for a timepiece comprising a dampening element between two gongs.
