Abstract (en)

[origin: WO2009053019A1] The invention relates to a carrier body (1) for sanitary surface material, having a bearing surface for the sanitary surface material, having a floor surface for arranging on an underlying surface, having a through-opening which runs approximately in the vertical direction of the horizontal carrier body, and forms lateral end surfaces, and having a sealing element, which covers over at least one of the surfaces at least in part, wherein the sealing element on the at least one surface is fixed only to a first sub-region (11) and loosely covers over at least a further, second sub-region (12) of the surface. The invention also relates to a method of adapting such a carrier body to the desired floor dimensions of a sanitary shower facility, and to the use of this carrier body for a sanitary cubicle.
