Abstract (en)

[origin: WO2009089855A1] The present invention relates to an electric surgical instrument comprising a display device for displaying at least one piece of status information of a control unit, wherein the display device is disposed on the electric surgical instrument and aligned in the distal direction thereof such that it illuminates an operating field of the electric surgical instrument in an active state. The use of the display device according to the invention fulfills a double function. It provides information and simplifies medical intervention by illuminating the operating field.
