Abstract (en)
[origin: WO2009057167A1] The invention concerns a method for making an element (1, 100) for covering surfaces that comprises the following operation: preparation of a support element (2) defining an upper surface (3) and a lower surface (4), and also comprising the following operation: application of a layer of refracting and/or reflecting and/or iridescent and/or bright and/or glossy material to part of the upper surface (3). The invention also concerns a corresponding machine, an element for covering a surface and a covering obtained therewith.
