Abstract (en)

[origin: WO2009050003A1] The invention relates to a method for operating a rinsing liquid device (2) in a household appliance (1) for cleaning pieces of laundry, wherein the condensation created during the cleaning process is collected as rinsing liquid in a rinse container (5), and is guided specific to the operating phase for removing lint from a heat exchanger (8) of a heat pump of the household appliance (1) by said heat pump, wherein the rinse liquid guided through the heat exchanger (8) is automatically guided into a collection container (4) of the rinsing liquid device (2) or into an external waste water system (19) as a function of a specific connection type of the rinsing liquid device (2). The invention further relates to a rinsing liquid device.
