Abstract (en)
[origin: WO2009059842A1] The invention relates to a piston pump (1) for a hydraulic vehicle brake system, having a pump piston (4), which can be driven to carry out an axial back-and-forth stroke movement, and having a valve (21) that is configured as a return valve, having a valve-closing body (25) to which a spring force is applied by a closing spring (24) in the direction of a valve seat (29). The valve-closing body (25) has a concave section (26) interacting with the valve seat (29) and a shaft section (27) facing away from the valve seat (29).
