Abstract (en)
[origin: WO2009059896A1] The invention relates to a connecting hardware for lightweight boards, particularly honeycomb boards, having a first housing part (10) set in a recess of a first lightweight board (2), and a second housing part (20) set in a recess of a second lightweight board (3). The first housing part (10) is adjustable relative to the second housing part (20), wherein at least one clip (30) is provided for fixing the first housing part (10) and the second housing part (20) to one another in a predetermined position. Compensation for tolerances can thereby be made in a simple manner.
