Abstract (en)
[origin: WO2009059821A1] The invention relates to a connecting fitting (1) for lightweight building panels (2, 3), particularly honeycomb panels, comprising two housing parts (10, 12) that are positioned at a distance from each other, wherein each can be inserted into an opening (8) on a lightweight building panel (2, 3), wherein the housing parts (10, 12) are connected to each other via a clamping device (11). At least one locking means (17) is provided on the connecting fitting (1) in order to secure the connecting fitting (1) from falling out of the opening (8) of the lightweight building panel (2, 3). In this manner, installation of the connecting fitting (1) is facilitated, and the connecting fitting (1) can be pre-fixed.
