Abstract (en)

[origin: WO2009064305A2] Embodiments of the present invention generally relate to a portable lighting device and method thereof. More specifically, embodiments of the present invention relate to a portable lighting device having a housing comprising a power supply, controller, and light-emitting diode (LED) panel. In one embodiment of the present invention, a portable lighting device comprises a housing having a base and a lid, a power supply and a controller disposed within the base, and at least one light-emitting diode (LED) panel disposed on an inner surface of the lid.
