Abstract (en)  
[origin: EP2208434A1] A make-up compact has a hollow base (10), a lateral tray (30), a front cover (20) and a slider (33). The base (10) has a front surface and an oblique slot (15). The oblique slot (15) is formed on the front surface and communicates with a chamber (12) of the base (10). The lateral tray (30) is slidably mounted in the base (10) and has an edge and a longitudinal slot (32) formed in the edge. The front cover (20) is movably mounted on the base (10) and has a rear surface and a transverse slot (25) formed on the rear surface. The slider (33) is slidably mounted in the longitudinal slot (32) and protrudes through the oblique slot (15) into the transverse slot (25). As the front cover (20) moves, the front cover (20) induces the slider (33) to move the lateral tray (30) for improved convenience.
