Abstract (en)

Method for producing a mattress base (1) comprising a support (2), which support comprises a framework (33) of longitudinal girders (3) extending in the longitudinal direction and transverse girders (4) connecting the longitudinal girders to one another, which mattress base (1) comprises a support surface (11, 12), comprising the following steps: - providing adjustable transverse girders (4) and/or adjustable longitudinal girders which comprise at least two girder parts (5, 6) which are in line with one another and which can be displaced relative to one another in line with one another, - adjusting the adjustable transverse girders (4) and/or adjustable longitudinal girders in such a manner that a desired length thereof is achieved, - attaching the support (2) to the mattress base (1) while maintaining said desired length of the adjustable transverse girders (4) and/or longitudinal girders (3).
