Abstract (en)
[origin: EP2208688A1] The packaging (100) has a support body (134) comprising a receiving channel for an edge region of a sink (102). The support body comprises a base body (142) and an additional body (214), which is connected with the base body in a form-fit manner. The additional body comprises a damping projection (182), which is partially arranged in a region of the support body. The base body and/or additional body comprises a holding projection, which is engaged in a holding recess of the additional body and/or base body when the bodies are connected together in a form-fit manner.
