Abstract (en)

[origin: EP2208823A2] The planted grid body has a mold (1) which comprises a base (6), a casing (2) and intermediate walls (4) for dividing a cavity enclosed by the casing in individual hollow chambers (3). A part of the hollow chamber is distributed over the contact surface of the mold which is formed by plastic material, where the casing forms the connecting slots (8) passing over a casing level. The connecting slots form the connection bars (9) on opposite outer sides.
