Abstract (en)

[origin: EP2208841A1] The tool has a rod (4) e.g. telescopic rod, whose one end is provided with a widened base (6) and another end is provided with a hooking device (7). A movable element (9) is mounted pivotingly on a fixed element (8). The fixed element comprises a straight edge. The movable element is extended by a tab (12). The fixed element and the movable element are arranged such that an edge (13) of the tab is jointed against the straight edge of the fixed element. A space formed between the edge of the tab and the straight edge is provided with a housing. An independent claim is also included for a method for opening an opening and maintaining opening position of an opening of a motor vehicle.
