Abstract (en)  
Disclosed herein is an air conditioner including a front panel (40). The front panel (40) includes a center panel (41) provided with a display (49) and moving panels (46) provided respectively at both sides of the center panel (41). In the air conditioner, as the moving panels (46) are moved forward by drive units (50), discharge holes (42,43,44) are defined at both sides of the moving panels (46), to discharge heat-exchanged air. Accordingly, the air conditioner may discharge the heat-exchanged air forward from both sides of the moving panels (46) without exposing the interior thereof.
