Abstract (en)
[origin: WO2009059879A1] The invention relates to a domestic appliance, in particular dishwasher, having at least: a treatment container with a container door which is pivotable about a pivot axis, and a door-weight compensating device for at least partially compensating for the weight of the container door by means of the spring force of a spring means which is connected in a manner transmitting spring forces by a tensile transmitting means (4) to the container door which has a deflector (1) arranged pivotably about a pivot axis (8). The invention is characterized in that the deflector (1) has at least two sliding surfaces (10, 11) for the deflection of the tensile transmitting means (4).
