Abstract (en)
[origin: WO2009059839A1] The invention relates to a hand-held power tool, particularly an angle grinder (10), having a gear housing (12) that forms a flange neck (14), having a protection device (20) accommodated on the flange neck (14) and forming a receptacle region for a tool (18), said protection device being pivotable in the circumferential direction (22), and having at least one locking device (24) for locking a pivoting position of the protection device (20). The invention provides that the locking device (24) be at least partially integrated into the flange neck (14) of the gear housing (12).
