Abstract (en)
[origin: WO2009059846A1] The invention relates to a hand-held power tool, particularly an angle grinder (10), having a housing (12), having a flange neck (14), and having a protection device (16) that can be accommodated on the flange neck (14), which forms a receptacle region for a tool. The invention proposes that at least one device (22, 24) be provided for damping and/or balancing of clearance between the housing (12) and the protection device (16).
