Abstract (en)  
[origin: WO2009065475A1] The invention relates to a valve gear mechanism, especially of an internal combustion engine, comprising an actuation device (10) having at least one switching element (11) which is adapted to switch at least one cam element (13, 14) by means of a shifting gate (12). The valve gear mechanism is characterized by comprising a change-over device (15) for changing over a direction of switching of the switching element (11).
