Abstract (en)

[origin: WO2009049696A1] The present invention relates to a brake lining set (20, 22) for a disc brake having an application device. Said brake lining set comprises at least one first brake lining (20) disposed on the one side of the brake disc (2) and one second brake lining (22) disposed on the other side of the brake disc (2). The brake lining set is characterized in that the friction lining of the first brake lining has a different compressibility from the friction lining of the second brake lining.
