Abstract (en)
[origin: WO2009059827A1] The invention relates to a drive unit, particularly a geared motor for windshield wipers, window lifting devices, or the like, of a motor vehicle, having a gear in a gear housing (14) and commutator motor disposed in a motor housing (12), comprising a stator (18) and a rotor (20), which together with a commutator (28) is disposed on a shaft (22) projecting into the gear housing (14). A brush holder (33) positioned in the gear housing (14) for at least two brushes (30, 31) adjacent to the commutator (28) under the pressure of double-journal brush springs (32, 33) is configured substantially in a U shape and has locking devices (46, 48) for supporting the brush springs (32, 33) in a positive fit on at least one side.
