Abstract (en)
[origin: EP2210522A1] A table has a substantially plate-like top plate, a pair of beams arranged side by side on the lower surface of the top plate and supporting and fixing the top plate, and supporting bodies arranged on the pair of beams so as to lie in the longitudinal direction of the pair of beams and supporting and fixing the pair. The supporting bodies have on the upper portions thereof a substantially horizontal pair of first placement surfaces and a pair of second placement surfaces extending from the first placement surfaces and inclined in the lateral direction of the beams. The beams each have a top plate supporting surface to which the top plate is fixed, a first bottom surface which is, at least in the area supported by the supporting bodies in the longitudinal direction, supported in a contacting manner by a first placement surface, and a second bottom surface extending from the first bottom surface, inclined, and supported in a contacting manner by a second placement surface.
