Abstract (en)

[origin: EP2210525A2] The system has a drive coupled with an activator and movably supported in a housing (2). The drive stands in effective connection with a locking bar (5) for locking extendable furniture parts (1) that are arranged one above other. Another drive (7) is coupled with the activator, and is movably supported in the housing, which stands in contact with functional elements such as self-feeding and/or damping elements. The activator and another activator (6) are fixed at the furniture parts. The latter drive is coupled with an ejection device (10). An independent claim is also included for a furniture, comprising a front panel.
