Abstract (en)
[origin: EP2210668A2] The carrier has multiple holes for inserting pipette tips, and a detachable unit for detachable connection of a frame (1) and a plate. Contact areas (8) are fixed at an upper edge (7) of the frame and a lower side of the plate. The contact areas are connected with each other if the plate is attached on the frame. A guide element (9) is aligned transverse to the contact areas at the frame and the plate, where the contact areas are interlinked with a lateral clearance. The guide element is connected at side walls (2-5) of the frame, where the side walls are fixed opposite to each other.
