Abstract (en)

A storage container (300) comprising at least one storage unit is disclosed, the container being collapsible as well as operable to store items in two states. In one operable state the container walls (110) are opened out along hinges connecting them so as to allow access to the plurality of storage receptacles simultaneously. In another operable state the container walls are closed, the storage receptacles being stacked one above the other. In this state, a removable lid (600) may also be provided.
