Abstract (en)

[origin: EP2210818A1] The web section (2) has a front wall section (10) including upper and lower edges and inner and outer sides. The outer side extends from a lateral boundary (32) of a side wall section (6) to a lateral boundary (34) of a side wall section (8). The former side wall section forms a folding line, and the latter side wall section forms another folding line. A lower edge of a section (26) of the latter side wall section does not extend in a direction of a longitudinal axis up to longitudinal extension of a lower edge of another section (28) of the latter side wall section. An independent claim is also included for a side gusseted bag.
