Abstract (en)

The invention relates to a method for fermenting wet biomass, wherein use is made of a device (1) according to the invention, comprising: - a tank (2) provided with an inlet (3) for admitting material for fermenting and provided with an outlet (4) for discharging fermented material; - a discharge (5) in gas throughflow connection with the tank for discharging produced biogas; and - stirring means (6) for stirring and mixing material present in the tank, wherein material present in the tank is stirred in a manner such that the mixing is incomplete and multiple zones (2a,2b,2c) form in the tank with dry matter contents differing from each other.
