Abstract (en)

[origin: EP2210982A2] The driven high-pressure cleaning machine (1) comprises a chassis (10) which is fitted with multiple wheels, where the high-pressure cleaning machine is fitted with an injection barrier, such that a coupling is formed between a power wheel drive (24) and a high-pressure pump drive (61). A high pressure pump (60) conveys water to a spray device under high-pressure conditions, when the high-pressure cleaning machine runs on a floor area (2) which is cleaned.
