Abstract (en)
The strip has a covering side piece (4) and/or base side piece (3) provided with reference bending points (7). A driving channel (10) is supported at the base side piece, where a screw (11) is intervened in the driving channel. The screw penetrates through a borehole (12) of the covering side piece. The strip partially overlaps a floor e.g. parquet, laminate or stone floor, covering (2) at a bottom side by the base piece and at an upper side by the covering piece, where a distance between the base piece and the covering piece is adjustable for adaptation to thickness of the floor covering.

Abstract (de)
Eine Randabschlußschiene für einen Bodenbelag (2) weist einen Basisschenkel (3) und einen Abdeckschenkel (4) auf. Diese sind einstückig miteinander verbunden. Um die Randabschlußschiene am Bodenbelag (2) wirksam festlegen zu können, ist am Basisschenkel (3) mindestens ein Treibkanal (10) abgestützt. In diesem Treibkanal (10) greift mindestens eine Schraube (11) ein, die eine Bohrung (12) des Abdeckschenkels (4) durchsetzt.
