Abstract (en)
[origin: WO2009051483A2] An apparatus for removing objects from bottles, comprising: - a conveying track (5) for conveying the bottles (2); - first blowing means (20), which are disposed along the conveying track, and which are designed for blowing air into bottles (2) conveyed under the influence of the conveying track, for the purpose of removing objects (P) from the bottles through propulsion of air. The invention further provides a method for removing objects from bottles, comprising: - conveying bottles (2) to first blowing means (20); and - utilizing the first blowing means (2) for blowing air into bottle mouths of the supplied bottles (2) such that objects present in the bottles are removable from the bottles (2) via the bottle mouths under the influence of the air.
