Abstract (en)  
[origin: WO2009049335A1] Outrigger extending arrangement (1) for trucks, in particular for trucks with a loading crane, comprising at least one side leg (2) which can be adjusted between an operating position and a transporting position, and a transporting lock (3) for the side leg (2), wherein the transporting lock (3) has at least one locking device (4) for locking the at least one side leg (2) in the transporting position and a signalling device (6), which can be activated by the side leg (2) in the transporting position, and the signalling device (6) is coupled to the at least one locking device (4) in such a way that the locking of the locking device (4) leads to actuation of the signalling device (6).
