Abstract (en)

[origin: EP2213195A1] The stencil (5) has sides (2, 3) made of flexible material i.e. cardboard, and movably connected with each other at a fold edge (4), which horizontally divides a sheet (1). The sides have recesses (7, 8) partially overlapping on the successive sides by folding the sides about the connected edges. An elastic band (6) is arranged at lateral edges of the side (2) for fixing the stencil on hair of a head of a person. The edge collapses between the sides, and forms parallel folds e.g. fan folds, in the sheet. An independent claim is also included for a hair coloring device comprising a stencil.
