Abstract (en)
[origin: EP2213597A2] The box has a support wall (22), a jogging wall (24) adjacent and perpendicular to the support wall, and another jogging wall (26) that is simultaneously adjacent and perpendicular to the support wall and the former jogging wall. The walls are rejoined at a single junction point (28), and the support wall includes a slot (22C) for permitting passing of motorized supply rollers of a post article processing machine. The support wall includes another slot for permitting passing of motorized extraction belts or rollers of the machine.
