Abstract (en)  
The first wall (10) is joined to a connector (28). The second wall (14) is joined to a second connector (30). The connectors (28, 30) are joined by holders (40) which allow them to slide relative to each other, in the longitudinal direction (26). The components are designed to limit the longitudinal movement. A stop limits pulling-apart. The walls include reinforcing rods, which are joined to the connectors. The connectors include longitudinal slots (24) through which the holders (40) project.

Abstract (de)  
Eine Übergangskonstruktion zwischen Betonleitwänden (10, 14) weist jeweils ein Verbindungselement (28, 30) auf, das mit jeweils einer der Betonleitwände (10, 14) fest verbunden ist. Die beiden Verbindungselemente (28, 30) weisen jeweils Längsschlitze (34, 38) auf, durch die Halteelemente (40) geführt sind. Hierdurch ist ein Verschieben der Verbindungselemente (28, 30) zueinander in Längsrichtung (26) möglich
