Abstract (en)

[origin: EP2213824A2] The window (1) i.e. residential roof window (2), has a holder (6) for fastening the window to a structural body by a fastening screw. The holder has a holding element (7) e.g. metal sheet bracket (9), for holding the window. The holding element is attached to a window frame (3) of the window and to the structural body. A heat insulation block (14) is arranged between the window frame and the structural body and attached to the window frame. The holding element is fastened to the window frame by interconnection of a plastic heat insulating spacer (18).
