Abstract (en)
The refrigeration device or freezer device has one or multiple compartments or inner containers, where one compartment or inner container comprises deep-drawn metal. A device is provided as the refrigeration device or a chest freezer or an upright freezer. The metal is painted or coated as a coated metal, where the metal is aluminum or a galvanized metal or steel or an alloy. An independent claim is also included for a method for producing a compartment or an interior container of a refrigeration device or freezer device from metal.
