Abstract (en)
The cargo-projectile (1) has a cargo hold (4) wrapped around a projectile body (2). An absorption element (7) is arranged in the cargo hold to absorb enemy projectiles. The absorption element is accommodated in a freight container (5) that is pivotably mounted over a supporting element (6) opposite to the projectile body. The absorption element is designed in the form of a network. The projectile body is sealed by a projectile base (3). An output element (8) is connected with the absorption element and designed in the form of a braking parachute.

Abstract (de)
Die Erfindung betrifft ein Cargo-Geschoss mit einem von einer Geschosshülle (2) umhüllten Frachtraum (4), in welchem ein Abfangelement (7) zum Abfangen gegnerischer Flugkörper (50) angeordnet ist, wobei das Abfangelement (7) in einem gegenüber der Geschosshülle (2) über mindestens ein Lagerelement (6) drehbar gelagerten Frachtcontainer (5) untergebracht ist.
