Abstract (en)  
[origin: EP2213975A2] The cargo-projectile (1) has a cargo hold (4) wrapped around a projectile body (2). An absorption element (7) is arranged in the cargo hold to absorb enemy projectiles. The absorption element is accommodated in a freight container (5) that is pivotably mounted over a supporting element (6) opposite to the projectile body. The absorption element is designed in the form of a network. The projectile body is sealed by a projectile base (3). An output element (8) is connected with the absorption element and designed in the form of a braking parachute.
