Abstract (en)
[origin: WO2009068341A1] The invention relates to a hand-held power tool, particularly an angle grinder (10) having a housing (14) that comprises a flange neck (12), having a protective device (16) that can be accommodated on the flange neck (12) and that can be pivoted in the circumferential direction (18, 20), and having at least one device (22) for blocking at least one pivoting direction (18, 20) of the protective device (22). The invention proposes that the device (22) for locking comprise at least one stop (24) and at least one counter-stop (26) interacting with the stop (24).
