Abstract (en)
[origin: WO2009062589A1] The present invention relates to a drawing frame, comprising a top-roll carrying and loading arm (1), on which pneumatically loaded top rolls (5, 6, 7) are arranged in each case on a vertically displaceable strut (3) in a holding device (2), a pneumatic pressure body (4) which is arranged in the top-roll carrying and loading arm (1) for applying a pressure force to the struts (3), and a pressure roll (8) of a condensing device which, furthermore, comprises a lower roll, against which the pressure roll (8) is pressed with a pressure force, wherein the pressure roll (8) of the condensing device is integrated into the top-roll carrying and loading arm (1) on an additional strut (11) in a holding device (10), and wherein the pressure roll (8) is loaded with the pressure force of the pneumatic pressure body (4) via a pressure plate (12).
