Abstract (en)
[origin: US2009114075A1] A tuning peg for a stringed musical instrument is suggested, comprising a shank with a first area which forms a string supporting area and at least one additional area which forms a mounting area for fixing the tuning peg to the stringed musical instrument, wherein the first area is rotatable relative to the at least one additional area, a first gear wheel which is connected non-rotatably to the first area, at least one additional gear wheel which is connected non-rotatably to the at least one additional area, a head which is arranged on the shank so as to be rotatable about an axis of rotation and at least one drive gear wheel which is arranged on the head and which acts on the first gear wheel and the at least one additional gear wheel.
